

THE BASIC IDEA

We install a breath analyzer on your vehicle that is electronically connected to the ignition. This device, the SSI 1000, is about the size of a cellular phone.

When you breathe into the unit for several seconds, it measures your breath alcohol level and compares it with predetermined limits. If your breath alcohol concentration (BrAC) is over the authorized limit, your vehicle will not start.

If your BrAC is within the allowable range, you're on your way. Then, as you're driving, you will be required to take periodic "rolling retests."

Once a month, you will take your vehicle to a local Smart Start service center. There, our certified technicians will service the interlock device to make sure it works properly. You'll make your monthly lease payments when you bring your vehicle in for service.

Founded in 1992, Smart Start is the nation's leader in ignition interlock services. How did we become No. 1?

By consistently providing excellent service, the latest technology and reliable reporting. And, by treating our clients as valuable customers, not criminal offenders.

So when you have a choice, go where you're No. 1: Smart Start.

HOW TO GET STARTED

- ▶ See the enclosed list of Smart Start service centers to find the location that's most convenient to you.
- ▶ Call 1-800-880-3394 TOLL-FREE to schedule your installation appointment.
- ▶ Bring a copy of any paperwork specific to your interlock requirements, proof of address and photo identification with you to the installation.
- ▶ Allow one hour for installation of the SSI 1000 on your vehicle.
- ▶ At that time, we'll explain how to use the interlock, service requirements and what to do if you have any problems or questions.
- ▶ Sign your contract and pay for the installation and first month's lease.
- ▶ Find additional information on our web site: www.smartstartinc.com

"The people at Smart Start went above and beyond to help me. All I ever had to do was call the 800 number, and they would cheerfully take care of my question or request."
